Deeply Rooted in Your Perennial Success.

Growing Natives

Our renewed focus on growing native species and nativars serves many of our customers' desire to offer perennials that support pollinators and are easier on the environment. As the New Perennial Movement builds and native landscapes are becoming more popular, we are here to fill those plant needs. The idea of growing natural gardens filled with reliable perennials that require little intervention is one we can stand firmly behind.

Growing Relationships

If you've ever met Patty and Jay Steinhauser, you'll understand why people enjoy doing business with them. In an industry that can be aggressive and impersonal, Patty and Jay continue to remain fair and grounded while truly enjoying working with their customers. They simply are the kind of people you want to do business with. Together with their dedicated team, Stonehouse Nursery is ready to serve you.

Growing Time-Tested Favorites

We know customers always look first to see what's new and we are happy to provide a handful of new varieties each year. But what our customers really look to Stonehouse Nursery for are those time-tested favorites—plants like Salvia 'Caradonna' and Monarda 'Raspberry Wine' that have proven their salt. As many newer selections have come and gone, we are committed to continuing to propagate those rock solid perennials that landscapers have come to trust and retailers are happy to guarantee.

Growing with Integrity

Sustainability isn't just a buzz word at Stonehouse Nursery. We live and work on this land, and we want it to remain healthy for generations to come. We have never used neonicotinoids here. Beneficial insects and biologicals are our first line of defense and our IPM program helps us catch many pest issues early. Plus, by planting our stock in the summer, we can deliver heavily rooted, bulked up, vernalized PowerPlugs. This extra growing time on our end ensures the plants will take off quickly for our customers.

Quick Turn 32s finish quickly in 1-gal containers.
